

Report on Alumni Interaction-2021

Department of Mechanical Engineering arranged an Alumni interaction session on “Opportunities for Higher Studies” by Rajesh Raghavan. He is an Engineer working on the Consumers Energy's Building Tune Up program and ComEd RCx program as an Energy Engineer and a Project Coordinator respectively. Rajesh is currently based out of Grand Rapids, Michigan. His role with Consumers Energy involves conducting RCx assessments for commercial and public sector facilities and helping identify energy saving opportunities.

For the ComEd program, he is involved with both service provider and customer management and works closely with all entities to ensure successful completion of RCx projects. Prior to joining Nexant, Rajesh spent a year and a half working for CMC Energy on ComEd's Industrial Systems program and got his start in the energy industry by interning at the Industrial Assessment Center at the University of Missouri, Columbia. Rajesh has a B.E in Mechanical Engineering (2016 graduating batch) from JSSATE Bangalore and a M.S in Mechanical Engineering from the University of Missouri, Columbia.

Meeting was held using Google meet platform for BE(Fourth year) students on 17.03.2021 from 10:00AM to 10:30 AM (IST). This alumni interaction was arranged with an objective of helping the aspiring students for pursuing Masters program abroad.

In his interaction, Mr. Raghavan introduced the field of energy engineering and his role as energy engineer in USA. The job opportunities for the field in the future for mechanical engineering.

He suggested the students to decide in advance, the university to join, the specialisation available and the job prospects in USA, as the cost of education in US is costly.

The meeting was coordinated by Dr. B V Raghavendra and Dr. A R Annigeri.
