

Report: Alumni Initiative

Alumnus: Dipti B Koshti

Squadron Leader, Indian Air Force

The department of Mechanical Engineering is in the forefront to identify the Alumni's career progress in their chosen field. Every attempt is being made to hear from them of their achievements, personal growth, work satisfaction, etc.

As per our Joint Director (TED) direction and advice, the strength of any institute is measured by its Alumni and their involvement in molding academic career of the students through interaction. The department through the mentors started the Alumni Initiative by inviting passed out students to become brand ambassadors of the institute.

One such initiative Women in Defence Forces - A Sense of Pride was made to call upon Mrs. Dipti B Koshti, Squadron Leader, Indian Air Force. She was excited to be back at the Almamater for making an impact on girl students of the institute to take up a career in Defense Forces as Distinguished Officers and serve the country.

The interactive session was hugely applauded by the audience for her achievement shared and the discipline it brought in her life. She also spoke on women empowerment of how today's women are scaling new heights in all walks of life, balancing personal and professional life.

Mrs. Dipti was welcomed by Dr. Mythra, Senior Faculty, Dept. of Mathematics, with a brief introduction. Dr. B P Shivakumar, Dean - Students Welfare, presented the bouquet.

She was duly honoured for her achievements in the presence of HoD, Faculty & Students.

Lastly, vote of thanks was delivered by Mrs. Roopa, Faculty, Mechanical Engineering.
